```
import java.util.Scanner;

class student {
  String usn, name;

  void accept() {
    Scanner ob = new Scanner(System.in);

    System.out.println("Enter student name:");
    name = ob.nextLine();

    System.out.println("Enter student usn:");
    usn = ob.nextLine();
  }

  void display() {
    System.out.println("Student details are:");
    System.out.println("Name is: " + name);
    System.out.println("USN is: " + usn);
  }
}

class studentrun {
  public static void main(String arg[]) {

    Scanner sc = new Scanner(System.in);

    int n;
    System.out.println("Enter the number of students:");
    n = sc.nextInt();

    student s[] = new student[n];

    int i;

    for (i = 0; i < n; i++) {
      System.out.println("\nEnter the student details:");

      s[i] = new student();
      s[i].accept();
    }
```

```
        System.out.println("\n--- Student Details ---");

        for (i = 0; i < n; i++) {
            s[i].display();
        }
    }
}
```
